

SKIN FOR POCKET PLAYER V2.7 FOR POCKET PC PLATFORM

SKIN NAME: IRON CURTAINS by Pasa (Apr 2006)

RESOLUTION : 480X640 VGA

Background: This is my second skin after the first one which is listed as CD STAND on Conduits website.

I use Pocket Player mostly in my car while commuting between home and work.

So I tried to find a balance between appeal and the functionality.

As the Pocket PC is set on my dash board, I have provided large commonly used buttons to have 'finger' access to most common tasks.

Fonts are not skinned so that they can be read easily during driving.

I hope you enjoy it. Your comments are welcome sat4pc@yahoo.com.au

HOW TO INSTALL : Just copy the file "IRON CURTAINS.PSZ" into Pocket Player installation directory Pocket PC.
